

A professional organizer offers solutions, suggestions, choices and methods to help you create organization, order, and a pleasant environment in your home, office, or garage.

I work alongside you as a consultant, providing encouragement and support and suggesting solutions tailored to your particular needs, lifestyle, and personality. Then, I invest my time and labor to bring about the transformation of space that you are seeking.

Organizing creates an environment that helps you be more efficient and productive. It also helps you live every day in a way that is more satisfying and refreshing. When you are organized, you feel the difference, and so do others. Organizing is a skill, a learned behavior. It is not genetic or hereditary. I can teach you how to maintain the organization that you desire.

Hi, I'm Kim Bowlinger

I've been in business as *Rent an Angel* since 1997, helping individuals and families in the Tri-County area take care of their homes as well as many of the chores and errands they don't have the time or physical ability to do themselves.

I got started after helping a friend's mom move from her home of 25 years to a new home. She's a busy professional woman with no relatives in town. "Pack me up and move me," was her plea. And I did. I'd moved 9 times in 14 years. I knew how to do it.

That's me, with my son Zach

"You should be doing this for everyone, Kim," she said later, "You've been an angel. I couldn't have moved without you." And so, Rent-an-Angel was born.

I'm an energetic, highly-organized, busy working mom. I know how important it is to get organized and stay organized so I have time to enjoy my family and do all that I want to for myself and them. Like you, I want my surroundings to be neat, attractive, and pleasant, not only for myself but for my friends and family too. I'll bring that same sensitivity to any task or project I do for you.

Do you need a professional organizer?

Here's How It Works

As a first step, I come to your home or office to see the space you want to organize. This initial consultation is free.

This is when you tell me what you hope for and I ask questions. This helps me customize the organization based on your particular needs, your lifestyle, and your personality. If you decide during this conversation that my professional organizing services would be helpful to you, we discuss fees and set a date and time for the first organizing session.

During subsequent visits, together we analyze and categorize both space and items, as well as discuss the tools and processes that will most benefit you. then I get to work. I am available for follow-up visits to see how you are doing in staying organized or to help you make adjustments.

Organizing Your Office ... In your home or business office, I create or reorganize file systems for effective paper management and also do actual filing. I remove clutter and help create task-prioritizing systems to help you stay organized and productive.

Staging ... I reorganize your furniture or equipment to make a space more functional, comfortable, and visually pleasing. I utilize items you already have as much as possible, but may also suggest purchases to help you stay organized.
